

SPECIAL ISSUE ON

Physics-Informed Neural Networks (PINNs)

TABLE OF CONTENTS / INDEX OF MANUSCRIPTS

1.	Solving Time-Independent Schrödinger Equation for a Double-Well Potential in Quantum Plasma Systems using Physics-Informed Neural Networks <i>Tanisha Thakur and Ayushi Awasthi</i>	pp. 1–8
2.	Solving the Time-Dependent Schrödinger Equation for a Harmonic Oscillator and Extracting the Bohm Quantum Potential Using PINNs <i>Sanyam Walia and Ayushi Awasthi</i>	pp. 1–12
3.	Physics Informed Neural Networks (PINNs) Approach for Numerical Solution of Heat Equation <i>Gargi Rathore, Arushi Sharma and Ishwar Kant</i>	pp. 1–10
4.	Learning Solutions of Coupled Differential Equations with Physics-Informed Neural Networks <i>Aman Sharma, Ayushi Awasthi and O.S.K.S. Sastri</i>	pp. 1–6
5.	Physics-Informed Neural Networks (PINNs) for the Determination of Vibrational Energy Levels of the HCl Molecule <i>Tanuja Kashyap, Arushi Sharma and Ishwar Kant</i>	pp. 1–7
6.	Physics Informed Neural Network Approach for Estimating the Coefficients of the Semi-Empirical Mass Formula <i>Anjali and Ayushi Awasthi</i>	pp. 1–10
7.	Shell Structure of ^{40}Ca from the Woods-Saxon Potential by Solving the Time Independent Schrödinger Equation Using PINNs <i>Tamanna Saklani and Ayushi Awasthi</i>	pp. 1–8
8.	Solving Hydrogen Atom using Physics-Informed Neural Network for Ground State <i>Kanika, Ishwar Kant, Ayushi Awasthi and Arushi Sharma</i>	pp. 1–8

Journal's mission: Integrating Physical Principles with Artificial Intelligence: Theory, Applications, and Education.
